

V-Band Clamps / V Band Couplings / V Profile Clamps

Murray Corporation offers a premium V-Band Clamp for flanged connections, made with a variety of high quality material grade components. Our clamps go through extensive testing and our comprehensive process control insures you consistently receive the highest quality parts.

- **Markets:** Heavy Duty Truck, Automotive, High Performance and Racing, and Marine
- **Applications:** turbocharger systems, exhaust, emissions, diesel particulate filters, pumps, food and chemical processing equipment, muffler assemblies, and industrial applications where a flanged connection is required.
- **Features:** High Strength, Reliability, and Corrosion Resistance
- Custom solutions are available in various material types, thicknesses and widths, and various nut and bolt combinations. Higher performance materials are available.
